You will see a LED indication that the device has been turned on.</p>  <p>To turn your chill off, click the power button 5 times. You will see a LED indication that the device has been turned off.</p> <p>The device will power off after 1 minute of inactivity.</p> <p>Specs: Battery size: 1500 mAh battery Time to charge: 4-5 hours Working voltage: 3.7V - 4.2V Coils resistance: 0.5 ohm</p>	<p>Step by Step Guide to using your chill.</p> <p>Step 5: Insert your mouthpiece </p> <p>Step 6: Five clicks turn your chill on/off </p> <p>Step 7: Select your temp. phase low: red medium: green high: white</p>  <p>3 clicks will switch between temp. phases </p> <p>Step 8: Now press the button to heat up the coil. The longer you press it the hotter the coil gets. Roughly 12 second heat cycle.</p>	<p>freezer instructions.</p> <p>The chill is the first vaporizer in the world with a freezable tube. The tube can cool the vapor or smoke as it passes through. Think of it as an ice catch for your vaporizer.</p> <p>If you don't want to freeze your tube, it works as a normal glass mouthpiece.</p> <p>Your chill freezable tube will stay cold for the first few draws. After that you can refreeze the tube or use it as a standard tube.</p> <p>REMOVE FREEZABLE TUBE FROM VAPORIZER BEFORE FREEZING!</p> <p>The freezable tube is filled with a nontoxic solution. If your tube ever cracks, make sure to discard and replace immediately. If the solution comes into contact with your skin, wash the affected area with warm water and soap. Do not ingest. Do not put cracked or broken tube into the chill. DO NOT SOAK FREEZABLE TUBE FOR MORE THAN 10 MINUTES WHEN CLEANING!</p> 	<p>aqua bubbler.</p> <p>The aqua bubbler delivers smooth and filtered draws. The aqua bubbler is a nice alternative to the the freezable tube when you are on the go.</p> <p>how to fill aqua bubbler</p> <ul style="list-style-type: none"> - fill from the top. - fill to roughly where the red line is. - If you overfill your bubbler, you can remove excess water by following these steps: Turn bubbler upside down and do a chopping motion. This will expel any excess water. <p>Do not try and freeze the aqua bubbler. It is not freezable.</p> 	<p>how to load concentrate coil.</p> <p>Step 1: prepare legal concentrate. </p> <p>Step 2: grab your concentrate coil. </p> <p>you can use the metal tool. Step 3: load concentrate to preference. </p> <p>place directly on coils. Step 4: load coil into the coil chamber. </p> <p>Bonus Step: make sure to burn off any leftovers before your next load up. </p> <p>Step 5: snap coil chamber back into chill body. </p>	<p>metal tool.</p> <p>The chill metal tool has many functions. It stores in the bottom of your device, so you always have it with you.</p> <p>here are some of its functions</p> <ul style="list-style-type: none"> - removing coil from bottom - changing coils - changing metal screens - stirring dry herb coil - concentrate tool <p>*other nontraditional uses ;) (these are not real uses)</p> <ul style="list-style-type: none"> - balloon popper* - instrument (musical)* - tiny straight line maker* - cane for a hamster* - hair comb* - eating utensil* - zen garden tool* - finger snowboard* - decision maker* - drink stir stick* - leprechaun locator device* 	<p>warranty info.</p> <p>To file a claim online: Randys.com/warranty or Sales@Randys.com</p> <p>We can not replace any unit or part without a proof of purchase.
