## KIT INCLUDES/OPERATING

### ➔ Prime Vaporizer

The Prime is a variable voltage vaporizer that accepts 510 thread cartridges. You can either fill the included cartridge or thread on a pre-filled cartridge with the Prime. The 4 preset voltage settings are specifically set for different styles of vaporization of different types of thick oils. The lowest setting, Yellow - 3v, is best for oils that contain more liquid. The next setting, GREEN - 3.4v, will be used for oils that are a little thicker. BLUE - 3.7v is the 3rd setting and this is used for a more powerful and less flavorful hit for thick oils. The final setting is RED 4v and should only be used for the thickest style of oils. For additional information on thick oils & what voltage you should use please refered to your perfered online search engine.
