User Manual

Zinspo
CONCENTRATE VAPORIZER
AND STORAGE CONTAINER

SPECIFICATIONS

Battery Capacity: 400mAh

Current: 3A

Output Voltage: 2.8V/3.4V/3.8V

Charging Port: USB-C

Charging Time: Approximately 80 minutes

Resistance: 0.8-2.0Ω

POWER ON/OFF

Take quick draws or press the button five times. The light flashes once to confirm. (Zinspo will default to power on status after connection, no auto power off.)

PREHEATING

Take two quick draws or press the button two times. The light will pulse with color. Preheating lasts 15 seconds at a steady low voltage and stops if you use any other function.

CHANGING VOLTAGE

Take three quick draws within 1.5 seconds or press the button three times. The light shows the selected voltage.

Green light: 2.8V

Blue light: 3.4V

Red light: 3.8V

BATTERY LEVEL

Press the button once to check the battery.

Green light: >75%

Blue light: 35%-75%

Red light: <35%

CHARGING

Charging takes about 80 minutes. A red light stays on while charging. A green light stays on when fully charged.

RELEASING CART SLOT

Press the release button on top to unlock the slot. Insert the cart and press it back to lock.

STORAGE COMPARTMENT

Push down on the top of the device to slide the compartment out. It does not slide out when pressed from the bottom.

Zinspo fits 510 thread carts up to 2 grams and compatible devices like Sand Quartz Atomizers.

* Cartridge not included.

⚠ DO NOT USE DURING CHARGING

IMPORTANT: It is CRUCIAL to charge all Randy's devices with **5V chargers**. For best results, please use Randy's USB-C Charger (Sold separately on Randys.com).

PROTECTION FEATURES

Charging Protection: The device charges normally at 5V 0.5A. Higher voltage from 7V to 28V activates protection and stops charging. The indicator light turns off.

Smoking Time Out: If use lasts longer than 10 seconds the red light flashes four times and the device enters standby mode.

Overload: PCBA with overvoltage protection. If resistance is below 0.8 ohm the red light flashes three times and the device enters standby mode.

Short Circuit Protection: If a short circuit is detected the red light flashes three times and output stops.

No Load: White lights flash 3 times.
